EDUCATION

- Vellore Institute of Technology** Amaravati, Andhra Pradesh
B.Tech [CSE with Spec. in Data Analytics] — CGPA: 8.52 *Sep 2020 – May 2024*

EXPERIENCE

- mTouch Labs** Hyderabad, Telangana
AI/ML Engineer *Oct 2025 - Present*
 - Designed an agent-based compliance verification system for CoreLynx with tool-assisted evaluations, fuzzy matching, validating records against government portals and formula validation to generate explainable compliance verdicts on regulatory documents.
 - Built 7 AI microservices for Cheetah AI to automate the RFP lifecycle, integrating document summarization, content generation, contextual similarity scoring, and resume analysis; optimized OCR-based document processing to handle 30 documents per minute on a cost-constrained 4-core environment with fault-tolerance.
 - Developed a voice-AI lead intelligence system for NISM admissions using ElevenLabs conversational agents with GPT-4o-mini, enabling automated outbound outreach, transcript understanding, candidate qualification, intent classification, sentiment analysis, and structured lead scoring workflows.
 - Developed a web-assistant to handle inbound visitor enquiries, qualify leads and automate initial outreach via Elevenlabs voice agents on behalf of sales team.
- SignalX.ai** Hyderabad, Telangana
AI Engineer *Jan 2025 - Sep 2025*
 - Built Xena, a RAG-based chat assistant for vendor risk and compliance, integrated with DART and Riskmaster platforms via session-specific data pipelines, serving 10 clients with 250 queries per user monthly.
 - Developed RiskGPT, a chat interface for enterprises backed by 8 specialized agents handling risk assessment, compliance summaries, and SOP queries; agents are exposed as independent microservices for cross-platform integration.
 - Developed a document processing pipeline for vendor risk assessment, extracting 56 data points across 20 document categories, processing 250-300 documents monthly.
 - Annotated 1,500 images using stratified sampling and trained Tesseract OCR model for CAPTCHA solving during web crawling.
 - Built an internal monitoring system for 49 microservices with alerting and incident tracking and reducing recurrent incidents by 30%; maintained overall and bi-weekly technical and product documentation using Docusaurus to enhance team knowledge sharing.

TECHNICAL SKILLS & CERTIFICATIONS

Languages: Python, Java, JavaScript, Typescript, SQL

ML & AI: TensorFlow, Keras, PyTorch, Transformers, NLTK, Langchain, LangGraph, CrewAI

Backend & Architecture: Django, Node.js, FastAPI, Tornado, REST, gRPC

Databases: SQL (PostgreSQL), NoSQL (MongoDB, Redis), Milvus, Weaviate

Developer Tools: Git, Postman, Jira

Cloud and Infrastructure: GCP (Vertex AI, Compute Engine, Cloud Storage), AWS (S3, EC2, Kinesis, ECS, Lambda), Docker, Nginx, Kubernetes

DevOps & Monitoring: Grafana, Loki, Promtail, CI/CD Pipelines, wandb

Certifications: Oracle Cloud Infrastructure Generative AI, Summer Analytics (IIT Guwahati)
